

Harness the power of integrated technology

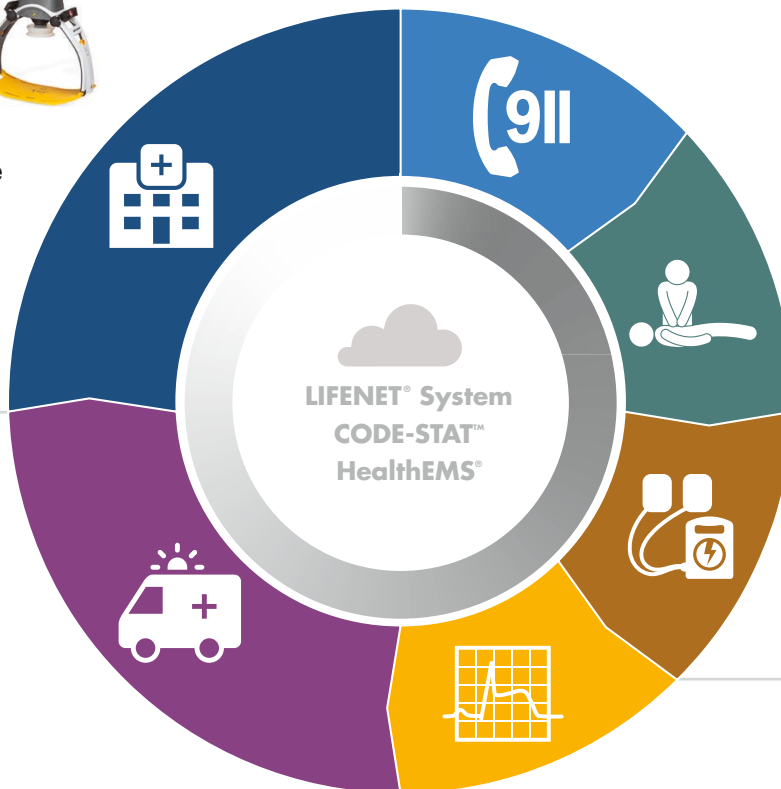

A systems-based approach

Empower your teams with an integrated system of tools, products and data solutions that work together to save time and strengthen teamwork.

Review and improve

Devices combined with data solutions provide actionable insights into areas of team performance including CPR effectiveness, operational efficiency, and more.

Stay ready

Your teams deserve durable and dependable equipment that is ready when they are – supported every step of the way by our unmatched service and a national network of experienced technicians.

Respond effectively

Improve your team's effectiveness with coordinated tools that prioritize connectivity and ease of use – including ST-segment trend monitoring, the Powered System, and comprehensive data transmission through LIFENET to hospitals.

Products that work together

Do everything in your power with Stryker AEDs.

LIFEPAK® AEDs provide energy capability up to 360 Joules for difficult-to-defibrillate patients. With an IP56 rating, the HeartSine® samaritan® AEDs offer the industry's highest level of protection against dust and water.

Free providers from manual CPR with the LUCAS® 3 chest compression system.

With high-quality chest compressions and fewer interruptions than manual CPR, LUCAS will administer Guidelines-consistent compressions until the job is done.

Manage airways more easily with the McGRATH™ MAC EMS video laryngoscope.

The McGRATH MAC EMS combines direct and video laryngoscopy into a single device designed to improve your view across the entire spectrum of intubation difficulty.

Discover toughness you can trust with the LIFEPAK 15 monitor/defibrillator.

The LIFEPAK 15 is the standard in emergency care for ALS teams who want the most clinically innovative, operationally effective and LIFEPAK TOUGH™ device available today.

Effectively raise and lower a cot at the touch of a button.

Now the standard of care, the Power-PRO XT was designed with extensive input from medics and utilizes a battery-powered hydraulic system.

Reduce the risk of injuries when loading and unloading cots with the Power-LOAD cot fastener.

An industry first, the Power-LOAD cot fastener system helps improve safety for you and your patients by loading and unloading the Power-PRO XT cot into and out of the ambulance—helping to reduce spinal loads that result in cumulative trauma failure.

Advance caregiving with the LIFEPAK 20e defibrillator/monitor with

CodeManagement Module™. Designed specifically for crash carts and patient transport in the hospital, the LIFEPAK 20e offers 360J escalating biphasic energy for both manual and automated defibrillation. CodeManagement Module allows you to wirelessly monitor device data using LIFENET Asset as well as send patient data to CODE-STAT data review software.

Integrated solutions that help improve patient outcomes and operational efficiency

Turn insights into actions with Stryker data solutions.

The LIFENET System, CODE-STAT data review software, and HealthEMS ePCR make it faster and easier to share information, collaborate, and generate insights that help to improve patient outcomes, team performance, and operational effectiveness. No time or staff for review? Receive expert summaries and targeted recommendations on request with our new CODE-STAT data review service.
